

## Some Do's & Don'ts to Help Keep You Safe

### DO'S:

- Wear a helmet, eye protection, long pants and protective shoes
- Ride with a buddy and stay on established roads and trails
- Pull off the side of the trail or road when stopping, so others can pass safely
- Be courteous and let faster riders go past
- Wait at corners and intersections for other members of your riding group and please respect private property.
- Be courteous and respectful to other trail users. Ride within your ability
- Stop, look, and listen when approaching intersections or joining a traveled road
- Ride on the far right side of roads, look around corners. Consider riding with a safety flag attached to your ATV.
- Ride with headlights on so others can see you better
- Carry, water, first aid kit and other essentials
- Leave no trash. Pack it in, and pack it out
- *Have Fun!*

## DON'T'S:

- Remember, ATV's are subject to all vehicle laws including DUI
- Ride at a speed too fast to stop for oncoming traffic. Cut corners or ride on wrong side of road
- Harass wildlife or livestock
- Speed around campgrounds or other users
- Do anything that makes ATV riders look bad to the public
- Follow too close, (leave plenty of space between yourself and the vehicle ahead)

## Some Things To Remember:

At intersections stop and wait for the next person. Get in the habit of stopping and turning around to wave at the person behind you and wait for them to wave back. This way our group can keep moving and no one gets lost. It only takes one person who does not wait for the next person and we spend the day looking for lost riders. If you wish to stop to take pictures or to just look around, please be courteous and pull off the side so that those behind you can continue on.

If you wish to ride at a slower pace that is fine but please ride toward the rear so you do not slow everyone down.

**Thank You for Riding Safe**

**Thank  
You!!!**
